The reasons to choose Aritech video security solutions

Developed by Aritech, a recognised leader in innovative security technology, the TruVision line brings the benefit of digital security monitoring to small business and commercial applications.

Because quality matters

Test standards that exceed standard practices.
We can be relied on.

Recorder testing

Hardware regression testing is required prior to first hardware approval after 3 months of recorder run-time and then an additional 3 months of testing is done to confirm initial test performance.

24-hr camera burn-in

All cameras require an industry-leading 24-hour production burn-in at the factory to ensure reliable operation in the field.

Local project assistance

Our field sales engineers and pre-sales support teams can provide free project consultation to ensure selection of the best video solution to meet your specific needs while staying within budget.

Because Privacy matters

Test standards that exceed standard practices.
We can be relied on.

Respect of Privacy

Products follow a clear path of steps to ensure private data is safe

Security vulnerability

Products are put through stringent security testing
Why? To protect the integrity of your installed video network
How? By mitigating potential network vulnerability security breaches

TruVision Software

TruVision software provides advanced video management capabilities within a streamlined, user-friendly interface. Compatible with Aritech TruVision brand cameras and recorders, TruVision Navigator is a unified security solution that's highly flexible and scalable. TVRMobile is an app for iOS and Android devices that allows you to access the system and monitor your facilities even while you're away.
TruVision Navigator

TruVision Navigator by Aritech brings together TruVision video and IFS® network switches into one unified interface. It's not only easy to install and use, but also offers greater scalability to accommodate future growth.

- Supports Analogue and HD-TVI video through TruVision recorders
- Supports H.264/H.265 IP video directly through TruVision cameras or recorders
- Maps, multiple video viewing tabs and live alarm monitoring
- Logical view in device tree and logical event filtering in notifier
- Supports ZeroWire and XGen intrusion panel via LAN connection.
- IFS network switch integration for discovery, login, configuration and monitoring
- Scalable for stand-alone or larger commercial (SME) server/client applications

TVRMobile App

Compatible with Apple® iOS and Android™ phones and tablets, TVRMobile allows users to access and monitor their TruVision video surveillance system from anywhere in the world.

- Real-time monitoring of analogue, HD-TVI or H.264/H.265 IP video via TruVision recorders or directly from TruVision IP cameras
- Send events from a TruVision device directly to your phone using push notifications
- View 1, 4, 9 or 16 channels on either tablet or phone
- Supports up to 100 devices
- Record snapshots, live video, or recorded video directly to a mobile device and export using standard methods such as text, email, etc.
- Remote connection via Wi-Fi®, 3G, 4G or LTE network
- Free downloads via iTunes® App Store or Android

Benefits of HD-TVI cameras

Higher resolutions

- Up to 8MP 4K resolution
- Clearer images

Progressive Scan

- No tearing on moving images (a possibility with interlaced images)
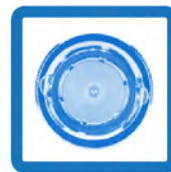

Can use existing coax infrastructure

- Easy to install
- Plug and play

Affordable

- Easy to install
- Rapid deployment

IP Network Cameras

In today's modern business world, you need the most up-to-date security technology to adequately protect your people and your property. One of the most effective pieces of equipment you can add to your security arsenal is the internet protocol (IP) security camera.

Aritech offers different line-ups in the IP camera portfolio to satisfy every need, every type of installation and every budget. Here is an overview of each series and their positioning, to give examples of how they would best apply to you.

truVision

a camera for each application

M series IP cameras

See only what matters. For those demanding precision of video events at competitive prices, the M series of IP cameras is the right choice. With embedded smart object classification, the cameras can filter out false alarms. With a choice of colors, lenses and form factors, the M series cameras are suitable for a variety of small and bigger applications.

M and P series IP PTZ cameras

Control your video surveillance. The M and P series of IP PTZ cameras complete our TruVision line up by bringing accurate and intuitive camera control to your fingertips. You can easily zoom, move the cameras to the desired position, run preconfigured tours and monitor your surveillance areas 24/7 with our software and mobile app. The new TruVision M series IP PTZ cameras are ideal for standard wide-area surveillance, both indoor and outdoor. The P series IP PTZ cameras with enhanced features and optical performance such as extreme low light sensitivity are suitable for demanding applications.

S7 IP cameras

More details, day and night. For those demanding installations that require a high resolution, the S7 series is the answer. In any light condition, experience the quality of the S7 cameras thanks to their excellent performance, sharp precision, ease of use and customization.

360° cameras

360° intelligence. The TruVision 360° panoramic cameras can be used to capture full 360° and 180° panoramic views in areas that would typically require multiple traditional cameras. With its embedded video intelligence such as intrusion detection, line crossing, object removal, and more features, this camera can ensure you have eyes everywhere with only one lens.

S series IP ANPR cameras

Management of vehicles has never been so easy. The S series ANPR cameras allow you to monitor or manage vehicle access on a site. The cameras can monitor and capture vehicles entering your premises or manage parking access for vehicles based on their license plate.

People Counting IP cameras

Know the flow. The TruVision People Counting Solution provides public safety and comfort by counting the number of people who pass through the entrance and the exit of a site. It instantly shows you the number of people on site.

Thermal IP cameras

See twice as much. TruVision thermal IP cameras is the answer for demanding customers to detect unwanted activities in difficult weather or light conditions. The thermal IP camera line-up offers advanced features such as bi-spectral and people/vehicle detection and audio alarms, to ensure your customer's optimal security with an accessible solution.
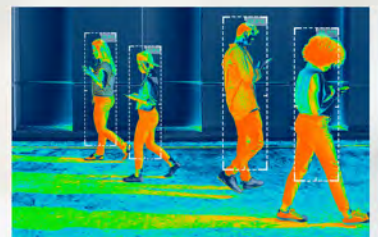

Multi-Imager IP camera

See more with four eyes. The multi-imager camera consists of 4 individual camera sensors that can be repositioned to best cover a scene. The TruVision Multi-imager camera is an ideal solution for surveillance applications that would normally require multiple cameras such as parking lots, large lobbies, or other open spaces. The camera is suitable for both indoor and outdoor applications.

Why a new naming for TruVision cameras ?

- **Future proof** : it leaves more room for possible future products (examples are greyed out)
- **Transparent** : this structure enables the identification of the camera while offering a logical sequence of characters
- **Consistent :** the series naming (example : the M series) is also adapted accordingly for a comprehensive transition

Old naming structure : S5 series TVD-5503
S6 series TVT-5609H
S7 series TVB-5714

truVision

TVN12 Network Recorder

Empowered by UltraSync cloud network

ultraSync
Empowered

The TruVision® network recorder series TVN12 is a versatile recorder ideal for small video projects.

Now with the newly added integration to the UltraSync® cloud network, the recorder can be managed remotely through the TVRMobile app and benefit from the current UltraSync features as well as upcoming capabilities.

With different recording options, channel capacities and hard drives, the TVN12 is one of the most flexible and efficient recording devices in our portfolio.

TVN12 and UltraSync: the value of our favorite duo

- Now you can add the recorders to the TVRMobile app with the ease of UltraSync connectivity
- Now the TVN12 recorders connected to UltraSync can send push notifications to TruVision TVRMobile app users
- Now no need to configure port forwarding or VPN – removes complications with building IT policy

For installers: you can see the recorder in your connected devices on the UltraSync portal

The installer needs to register the recorder on the UltraSync portal.

Upcoming features are in development and will continue to evolve. Stay on the lookout for updates!
