## System Overview

DH-AS5600-24GF4XF is an enterprise-level L3 switch based on industry leading high-performance hardware architecture.

DH-AS5600-24GF4XF realizes port high density of 1U device, and the host solidifies 4 ports 10 Gigabit optical. The device supports IRF, link aggregation, RRPP and STP to ensure high network stability. It also supports a abundant of security control strategies to ensure overall network security. The device has excellent management capabilities and supports multiple management interfaces, including the console port, micro USB port, and out-of-band management Ethernet port.

## Functions

### 10G Uplink

Suitable for aggregation scenarios, guaranteeing smooth transmission of large concurrent data.

### Intelligent Resilient Framework 2 (IRF2)

IRF2 is the stacking technology used in conjunction with the spare ports on the panel. It offers the flexibility to stack over longer distances, such as hundreds of meters across buildings or several kilometers between sites, using long-range transceivers.

### Powerful L2 and L3 Features

This series supports a large range of L2 features such as 802.1Q VLAN, Port Mirroring, STP/RSTP/MSTP, Link Aggregation Control Protocol, and the 802.3x Flow Control function. It also supports multiple L3 features, including OSPF and BGP, addressing enterprise access and aggregation service demands.

## Scene

Ethernet Switch meets the digital transformation and network construction needs of SMB, chain businesses, branches, governments, schools, hotels and other industries.
