

2N IP Force Security Bundle

Product Name: 2N IP Force Security Bundle

Manufacturer: 2N Telecommunications

Model Number: 9151198SET

2N IP Force Security Bundle

The 2N IP Force discount accessory bundle is for use with the 2N IP Force intercom units. The bundle provides the very highest level of security for your entrance doors at a discount price.

2N® IP Force Security Bundle

½ Discounted security accessory bundle for use with 2N Force intercom units

½ Additional switch

½ Security relay

The bundle includes an add-on switch (also including a tamper switch) and a security relay. The individual components of the bundle can also be ordered separately.

Additional switch

The additional switch allows you to control a second appliance, passive switching for an unlimited period of time, max. 30 V/1 A or active 12 V DC/max 700 mA. It also includes a tamper switch to signalise if the front panel is opened.

Security relay

The security relay is a simple add-on device which prevents unauthorised manipulation with the lock. It is installed between the intercom from which it is powered and the lock which it controls.
