TruVision TVD-VFM3 Dome Flush Mount Bracket Installation Instructions

Description

Figure 1: Physical description

Dimensions:	168 × 70.87 mm (6.61 × 2.79 in.)
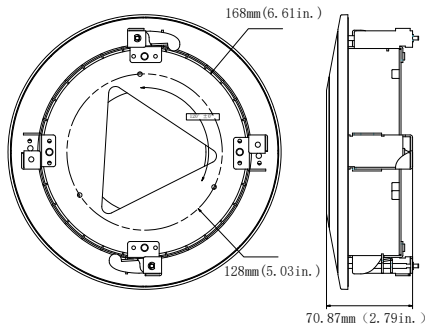

Weight:	606 g (1.34 lb.)
Supported cameras:	TVD-5604H, TVD-5605H TVD-5606H
Bolt, clamp and clip:	
	Bolt: 2 pcs
	Clamp: 2 pcs
	Clip: 2 pcs
Screw A	Screws PM4×13 mm (3 pcs) (used to attach the camera to the flush mount bracket)
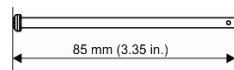

Installation

Note: The Dome Flush Mount Bracket is designed to be used when installing a dome camera in to a solid surface. It is not recommended to be used with drop down tile ceilings. Those tile ceilings are designed to have the ceiling tiles drop onto a metal framework. They are not structurally designed to accommodate the installation of external components.

To attach the additional two clamps to the flush mount bracket:

Note: The bracket comes with two bolts and clamps pre-installed. However, it is strongly recommended to use the other two bolts and clamps shipped with the bracket to ensure a more secure installation to the mounting surface.

1. Align the hole of the clamp between the two holes of the bracket leg.

2. Insert the bolt through the clamp and the holes in the flush mount frame.

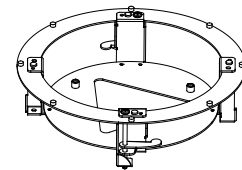

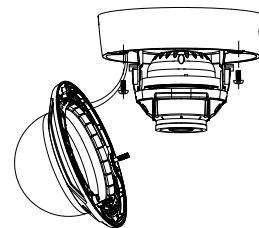

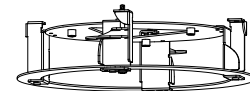

3. Use the enclosed clip to fasten the bolt securely to the flush mount.
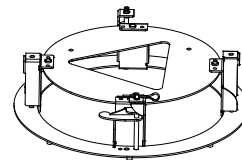

To attach the dome camera to the flush mount bracket:

1. Attach the camera (without the adapter plate) to the flush mount using the three A screws.

2. Reinstall the bubble assembly to the dome.

3. Install the trim ring to the flush mount.

4. The installation is complete.
