

DB950B

950/990 Series Standard Base (Black)

General

The DB950 is a BLACK, addressable fire detector base including a passive address card. It is designed to allow the detector to be fitted without the need for any force. It has a "one-way only" fit. A unique, patented addressing method provides simple, user-friendly and accurate identification of detector location whereby a coded card, inserted in the base, is read by any detector as it is plugged in.

Variants

This detector base is also available in WHITE with the same features (DB950).

Details

- Passive base address
- Electronic free base
- Programmable slide-in address card
- Compatible with 950 and 990 series detectors
- Full line device line consisting of ionisation, optical, temperature, multi sensors, manual call points and multiple I/O units
- Aesthetic design
- EN54, BOSEC, VdS, and CNBOP approved
