# Peripheral module

Part-No.: 772479

The peripheral module contains a fire brigade operating panel interface as well as an alarm transmission unit interface and three freely programmable, optionally monitored or up to 30 V DC floating common relays. The peripheral module can only be used on system terminal 1 of the control panel interface board.

Quiescent current	approx. 15 mA

ℹ Only one (Part No. 772477/78/79) module can be plugged onto the interface board.
