PRODUCT DESCRIPTION:

The CobiCabling Ravus Series cabinets are designed for superior functionality, with a strong construction and high load capacity. Features such as changing the side of the door mounting, quick removal of side covers, adjusting the position of the front and rear 19″ rails or easy access of cables make the product easy to install and very flexible.
The perforation at the upper edges of the casing facilitates air flow and reduces the heating of devices installed in the cabinet. The cabinets are available in heights from 4U to 27U with 450 and 600mm depths. The cabinets are delivered in a flat-pack version, for self-assembly. A full range of accessories is also available: shelves, ventilation panels, power strips, etc.
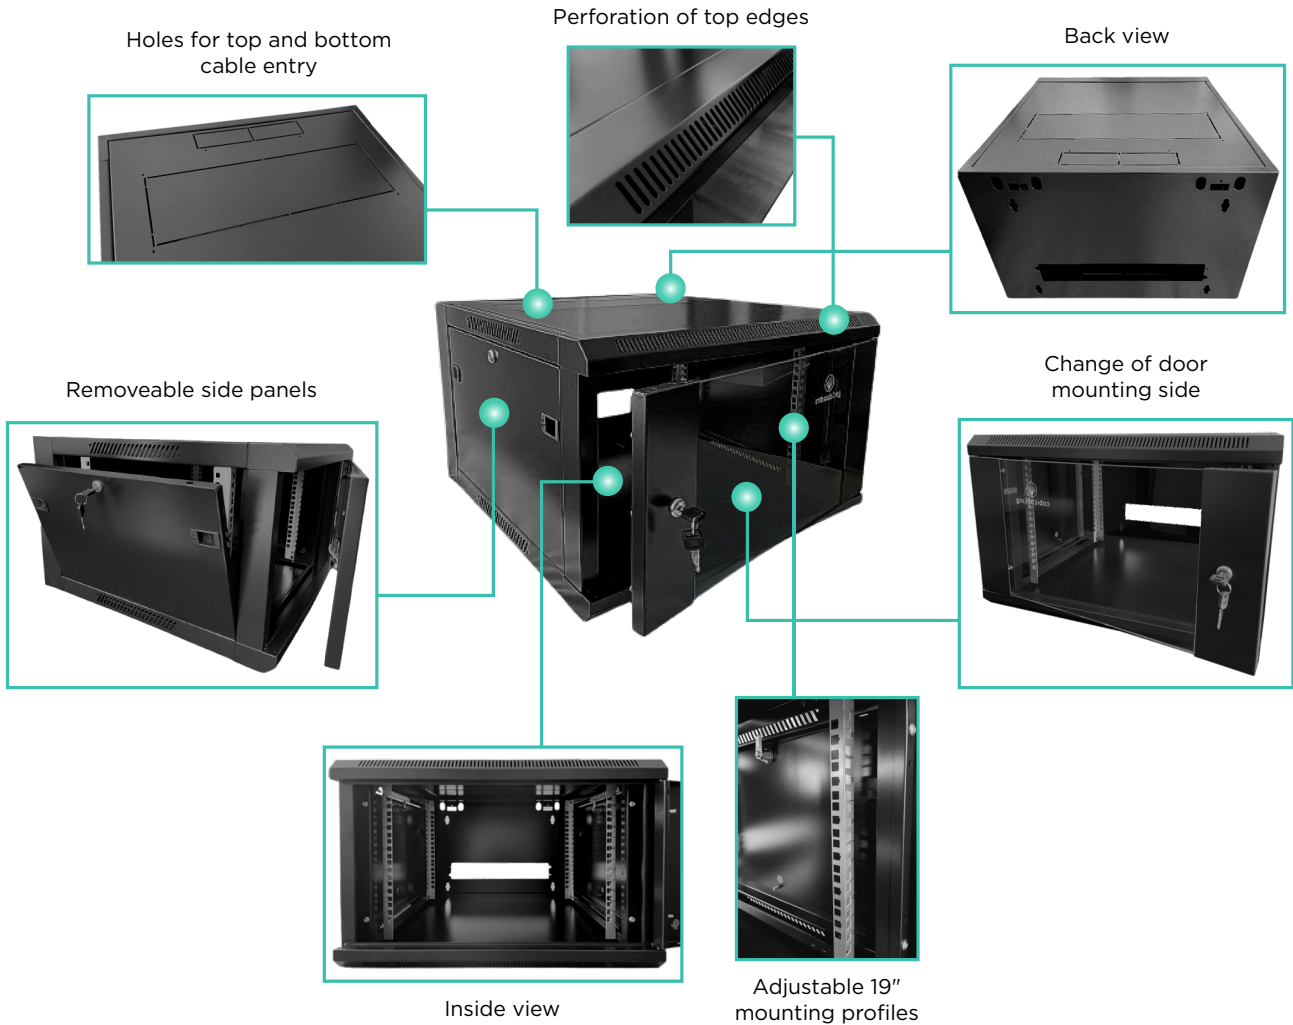

All these features make CobiCablingRavus are suitable for a wide variety of uses and posean excellent base for the installation of passive accessories such asand active devices.
