Description.

Description

Induction loop amplification system module (teleloop) used in combination with VDS and DUOX audio and video amplifier modules (including open door indication speech synthesis) to enable use by people wearing hearing aids (equipped with T selector). Connection to the amplifier module via the included multi-cable.

The "OneToOne" module with inductive loop shows the status of the board using 4 LED icons.

These icons symbolize:
- Call
- Conversation
- Door Opening
- Channel busy.

In addition, each of the sounds and audio reproduced by the amplifier are emitted by the inductive loop to the disabled people's devices.
