

uPASS Go

long-range UHF reader for vehicle identification

Key features:

- ✓ automatic vehicle identification
- ✓ read range up to 10 meters* (33 feet)
- ✓ operates with passive UHF tags (EPC Gen 2)
- ✓ supports variety of communication protocols
- ✓ easy installation and maintenance
- ✓ robust reader for outdoor use

The uPASS Go is a UHF RFID reader for long-range vehicle identification. Based on passive UHF technology, vehicles are identified up to 10 meters* (33 feet). The uPASS Go complies with the ISO18000-6C and EPC Gen 2 directive.

As the uPASS Go is used in combination with battery free UHF (EPC Gen 2) tags, the solution is cost efficient. It is ideal for convenient vehicle access to car parks, gated communities and staff parking areas.

Communication interfaces

The uPASS Go supports a variety of industry-standard communication interfaces, such as RS485, Ethernet, Wiegand and clock & data. This enables seamless integration into any existing or new access control or parking system. Existing proximity Wiegand reader installations can be upgraded without additional wiring.

OSDP capability

The uPASS Go UHF RFID reader supports the Open Supervised Device Protocol (OSDP v2) for automatic vehicle identification applications. OSDP enables advanced and secure channel communication between the uPASS UHF RFID reader and the controller.

TCP-IP protocols supported

Connecting the uPASS Go reader over the Ethernet interface offers the possibility to support TCP-IP. This opens up new possibilities to perform remote configurations and updates with the user friendly online configuration interface.

Easy installation

Featuring a slim housing, the uPASS Go fits perfectly in any vehicle gate environment. The reader can be installed with the supplied mounting set on an entry pedestal or wall near the barrier. With the optional mount set extension it can be mounted on a wall or ceiling in every possible angle for an optimal read area. The service hatch offers convenient access to the interfaces for installation and maintenance.

Built for outdoor use at the perimeter

The reader features a weather resistant housing and is fully operable in -30...+60°C (-22...+140°F), which means it can withstand the harshest outdoor environments. When exposed to extreme sunny conditions it is recommended to apply the optional weather protection hood. As the reader is typically positioned at the perimeter it has a tamper switch to immediately provide tamper indication.

Convenience for the driver

With the circular antenna polarization the tag orientation on the windshield becomes irrelevant as long as the tag is in line of sight for the reader. Especially convenient for cars with metalized windshields with only a small area without metal. The built-in beeper and high intensity LED provide audible and visual feedback on the identification of a tag in all operating modes.

** In combination with UHF Windshield Tag. The maximum read range depends on identifier type, the installation and environment.*

| Technical specifications | uPASS Go |

uPASS Go Accessories

Installation accessories for the
uPASS Go long range reader

Products:

- ✔ Mount Set Pole
- ✔ Mount Set Extension
- ✔ Weather Protection Hood

Mount Set Pole

With the Mount Set Pole, the uPASS Go reader can be mounted easily on a pole or flat surface. The front part is screwed to the back of the reader. The Reader can be positioned at an angle using the two side screws. The Mount Set Pole is standard included with the uPASS Go reader.

Mount Set Extension

The Mount Set Extension is an optional accessory to mount the uPASS Go reader to a wall or ceiling. The Mount Set Extension offers the possibility to position the reader both horizontally as vertically at the desired angle for an optimal line of sight. The front part of the standard Mount Set Pole needs to be installed in the extension set using the two screws.

Weather Protection Hood

If the uPASS Go reader is used in (extreme) sunny weather conditions, it is recommended to apply a Weather Protection Hood. This hood protects the reader from temperature rise by means of long lasting exposure to the sun. The Weather Protection Hood is an optional accessory and needs to be mounted on top of the front part of the standard Mount set Pole using two screws.

UHF Windshield Tag

long-range vehicle identification tag

Key features:

- ✓ automatic vehicle identification
- ✓ identification up to 15 meters* (50 ft)
- ✓ passive, battery free tag
- ✓ EPC Gen 2 compatible
- ✓ thin, flexible sticker format
- ✓ UV- and tamper resistant
- ✓ customized printing available on request

The UHF Windshield Tag is a vehicle identification tag. It offers cost effective long-range identification for parking applications.

Based on passive UHF technology, the UHF Windshield Tag is identified up to 15 meters* (50 ft) with uPASS Target or up to 7 meters (23 ft) with uPASS Reach. The tag does not contain a battery and is maintenance free.

Typical applications include secure vehicle access to car parks, gated communities/ condominiums and offices.

Easy installation

The UHF Windshield Tag can easily be fixed to a windshield as it has an adhesive front side. The thin, flexible, UHF sticker format tag is easy to install by permanently affixing it to the inside of a vehicle's windshield. The tag is protected against harmful UV rays.

Tamper resistant

For added security, the UHF Windshield Tags are tamper resistant so it will show visual proof of removal and are difficult to remove intact and functional.

Security

The UHF Windshield Tag is available in various formats, ensuring compatibility to any installation. Wiegand and Magstripe formatted tags are available to complement any access application. Nedap XS formatted tags are available to ensure easy integration for existing TRANSIT installations. Nedap formatted UHF Windshield Tags are featured with special security protection to provide data integrity and to prevent copying.

Customization

The layout of the tag can be customized to promote company logos, names, user distinction and/or designs. Optionally, the tag ID number can be printed on the UHF Windshield Tag in barcode 39 format. The barcode can be read by a barcode scanner to offer easy enrollment of tags into a management system and efficient enforcement of vehicles.

Note: custom format tags will have a different physical appearance than pre-programmed tags. Please contact your Nedap representative to discuss the customizaiton options.

**In combination with the uPASS Target reader. The maximum read range depends on reader type, the installation and the environment.*

UHF Cards

UHF card with optional proximity or smartcard technology

Key features:

- ✓ one card solution for access control
- ✓ identification up to 10 meters (33 feet)
- ✓ passive, battery free tag
- ✓ EPC Gen 2 compatible
- ✓ thin, ISO card format

The UHF cards are featured with long-range UHF technology and optional proximity or smartcard technology. These combi cards ensure the use of one single card for both vehicle and building access applications.

Based on passive UHF technology, the UHF Card is identified up to 10 meters [33 feet] with uPASS Target, 5 meters [16 feet] with uPASS Reach. The card does not contain a battery and is maintenance free.

Typical applications include secure access to parking areas in combination with building access at offices, gated communities or universities.

UHF ISO Card

The UHF ISO Card is a long-range identification tag that only uses UHF technology for vehicle or people access control. Customized printing of the UHF Combi Card and UHF ISO Card is available on request.

Combined technologies

The UHF Combi Card combines UHF technology with proximity or smartcard technology that is used for building access. This combination ensures compatibility and seamless integration with existing access control applications.

There are several UHF Combi Cards directly available;

- UHF - Mifare
- UHF - Mifare Desfire
- UHF - Legic Advant
- UHF - HID prox
- UHF - HID iClass

UCODE DNA secure authentication

uPASS UHF Exterior Tag

long-range vehicle identification tag

Key features:

- ✔ automatic vehicle identification
- ✔ identification up to 12 meters* (40 ft)
- ✔ passive, battery free tag
- ✔ EPC Gen 2 compatible
- ✔ transparent, thin sticker format
- ✔ protection against harmful UV rays
- ✔ tamper evident

The UHF Exterior Tag is a vehicle identification tag. The tag is mounted on the exterior of a vehicle, offering cost effective long-range identification for parking applications.

Based on passive UHF technology, the UHF Exterior Tag is identified up to 12 meters* (40 ft) with uPASS Target or up to 6 meters (20 ft) with uPASS Reach. The tag does not contain a battery and is maintenance free.

Typical applications include secure vehicle access to car parks, gated communities and offices. Other applications include access control of motorbikes, scooters and mopeds. This sticker tag is purposely designed to be adhesive to the non-metal/metal containing exterior parts of the vehicle, preferably the headlight**. This tag is the best option to enable reliable vehicle identification in situations where the entire car windshield is covered by solar film with metal particles.

Easy installation

The UHF Exterior Tag is a transparent adhesive tag that can easily be fixed onto non-metal/metal containing exterior parts of the vehicle, preferably the headlight**.

Tamper resistant

The thin, flexible, UHF sticker format is easy to install and offers a tamper resistant solution by affixing it to the exterior of the vehicle. For added security, the UHF Exterior Tag is tamper evident; the tag shows visual proof of removal and are difficult to remove intact and functional**. The chip inside the tag is protected against harmful UV rays.

Security

The UHF Exterior Tag is available with various programming formats, ensuring compatibility to any installation. Wiegand and Magstripe formatted tags are available to complement any access control application. Nedap XS formatted tags are available to ensure easy integration into existing TRANSIT installations. Nedap formatted UHF Exterior Tags are featured with special security protection to provide data integrity and to prevent copying.

* In combination with the uPASS Target reader. The maximum read range depends on reader type, the installation and the environment.

** Application of the UHF Exterior Tag on vehicles may be subject to local legislation. Please verify if legal restrictions apply in your region.

UHF Hangtag

long-range vehicle identification tag

Key features:

- ✔ automatic vehicle identification
- ✔ identification up to 15 meters* (50 ft)
- ✔ convenient to hang on rear view mirror
- ✔ passive, battery free tag
- ✔ EPC Gen 2 compatible
- ✔ UV-resistant
- ✔ customized printing available on request

The UHF Hangtag is a long range vehicle identification tag. It is the optimal solution for temporary parking access control applications.

Based on passive UHF technology, the UHF Hangtag is identified up to 15 meters (50 ft) with uPASS Target or 7 meters (23 ft) with uPASS Reach. The tag does not contain a battery and is maintenance free.

Temporary access control applications

For temporary access control applications, the UHF Hangtag is the optimal solution. As the tag is hung on the rear view mirror of the vehicle, it does not need to be attached to the windshield. It can be used for access control in parking lots, gated communities and any other situation where vehicles come and go.

Removable and reusable

The UHF Hangtag provides an excellent read range. It is completely removable and thus reusable. The logo and barcode are printed on both sides of the tag (standard part numbers). The barcode can be read by means of a barcode scanner to offer easy enrollment of tags into a management system and efficient enforcement of vehicles.

Customization

The layout of the tag can be customized to promote company logos, names and/or designs. The layout may include block type, stylized type, logos or other designs. All copy, block type, logos, designs and bar code are subsurface printed. This unique process provides excellent durability and rigidity.

**In combination with the uPASS Target reader. The maximum read range depends on reader type, the installation and the environment.*

UHF Heavy Duty Tag

long-range vehicle identification tag

Key features:

- ✓ automatic vehicle identification
- ✓ identification up to 18 meters* (60 feet)
- ✓ passive, battery free tag
- ✓ EPC Gen 2 compatible
- ✓ mounted on the exterior of the vehicle
- ✓ high performance on metal surfaces
- ✓ chemical resistant housing
- ✓ water and shock proof

The UHF Heavy Duty Tag is a vehicle identification tag. This tag features a rugged design for long term outdoor use in industrial environments. The UHF Heavy Duty Tag is a cost effective solution for installations that require the tag to be mounted onto the exterior of the vehicle.

Based on passive UHF technology, the UHF Heavy Duty Tag is identified up to 18 meters* (60 feet) with uPASS Target or 10 meters (33 feet) with uPASS Reach. The tag does not contain a battery and is maintenance free.

Typical applications include secured vehicle access in vehicle logistics, industrial operations, automated truck activities and parking access.

Industrial environments

The UHF Heavy Duty Tag is capable of reading on, off and near metal surfaces. The shock and impact resistant housing provides high resistance to aggressive liquids and excellent stability over fluctuating temperatures. The chemical resistant housing ensures ongoing long term performance. The elaborated designed and manufactured housing structure enables the tag to be truly waterproof.

Easy installation

The UHF Heavy Duty Tag needs to be mounted directly onto metal for optimal performance. It is featured with two mounting holes allowing easy permanent mounting onto the metal exterior of the vehicle.

Security

UHF Heavy Tags are available in various formats ensuring compatibility to any installation. Wiegand and Magstripe formatted tags are available to complement any access application. Nedap XS formatted tags are available to ensure easy integration for existing TRANSIT users. Nedap formatted UHF Heavy Duty Tags are featured with special security protection to provide data integrity and to prevent copying.

** In combination with the uPASS Target reader. The maximum read range depends on reader type, the installation and the environment.*
